

3.4 Zabbix Agent (UNIX, Inetd version)

The file contains configuration parameters for zabbix_agent. The file must exist and it should have read permissions for user 'zabbix'. Supported parameters:

Parameter	Mandatory	Default value	Description
Server	yes	-	Comma-delimited list of IP addresses of ZABBIX Servers or Proxies. Connections from other IP addresses will be rejected.
Timeout	no	3	Do not spend more than Timeout seconds on getting requested value (1-255). The agent does not kill timed-out User Parameters processes!
UnsafeUserParameters	no	0	Allow all characters to be passed in arguments to user-defined parameters
UserParameter	no		User-defined parameter to monitor. There can be several user-defined parameters. Format: UserParameter=<key>,<shell command> Note that shell command must not return empty string or EOL only. Example: UserParameter=system.test,who wc -l
