

application.create

Description

object application.create(object/array **applications**)

This method allows to create new applications.

Parameters

(object/array) Applications to create.

The method accepts applications with the [standard application properties](#).

Return values

(object) Returns an object containing the IDs of the created applications under the `applicationids` property. The order of the returned IDs matches the order of the passed applications.

Examples

Creating an application

Create an application to store SNMP items.

Request:

```
{
  "jsonrpc": "2.0",
  "method": "application.create",
  "params": {
    "name": "SNMP Items",
    "hostid": "10050"
  },
  "auth": "038e1d7b1735c6a5436ee9eae095879e",
  "id": 1
}
```

Response:

```
{
  "jsonrpc": "2.0",
  "result": {
```

```
"applicationids": [  
    "356"  
],  
"id": 1  
}
```
