

templatescreen.create

Description

object templatescreen.create(object/array **templateScreens**)

This method allows to create new template screens.

Parameters

(object/array) Template screens to create.

Additionally to the [standard template screen properties](#), the method accepts the following parameters.

Parameter	Type	Description
screenitems	array	Template screen items to create on the screen.

Return values

(object) Returns an object containing the IDs of the created template screens under the `screenids` property. The order of the returned IDs matches the order of the passed template screens.

Examples

Create a template screen

Create a template screen named "Graphs" with 2 rows and 3 columns and add a graph to the upper-left cell.

Request:

```
{
  "jsonrpc": "2.0",
  "method": "templatescreen.create",
  "params": {
    "name": "Graphs",
    "templateid": "10047",
    "hsize": 3,
    "vsize": 2,
    "screenitems": [
      {
        "resourcetype": 0,
        "resourceid": "410",
        "rowspan": 0,
```

```
        "colspan": 0,
        "x": 0,
        "y": 0
      }
    ],
    "auth": "038e1d7b1735c6a5436ee9eae095879e",
    "id": 1
  }
}
```

Response:

```
{
  "jsonrpc": "2.0",
  "result": {
    "screenids": [
      "45"
    ]
  },
  "id": 1
}
```
