

# hostprototype.isreadable

## Description

boolean hostprototype.isreadable(array **hostPrototypeIds**)

This method checks if the given host prototypes are available for reading.

## Parameters

(array) IDs of the host prototypes to check.

## Return values

(boolean) Returns true if the given host prototypes are available for reading.

## Examples

### Check multiple host prototypes

Check if the two host prototypes are readable.

Request:

```
{
  "jsonrpc": "2.0",
  "method": "hostprototype.isreadable",
  "params": [
    "10092",
    "10093"
  ],
  "auth": "038e1d7b1735c6a5436ee9eae095879e",
  "id": 1
}
```

Response:

```
{
  "jsonrpc": "2.0",
  "result": true,
  "id": 1
}
```
