

screenitem.update

Description

object screenitem.update(object/array **screenItems**)

This method allows to update existing screen items.

Parameters

(object/array) [Screen item properties](#) to be updated.

The screenitemid property must be defined for each screen item, all other properties are optional. Only the passed properties will be updated, all others will remain unchanged.

Return values

(object) Returns an object containing the IDs of the updated screen items under the screenitemids property.

Examples

Setting the size of the screen item

Set the width of the screen item to 500px and height to 300px.
