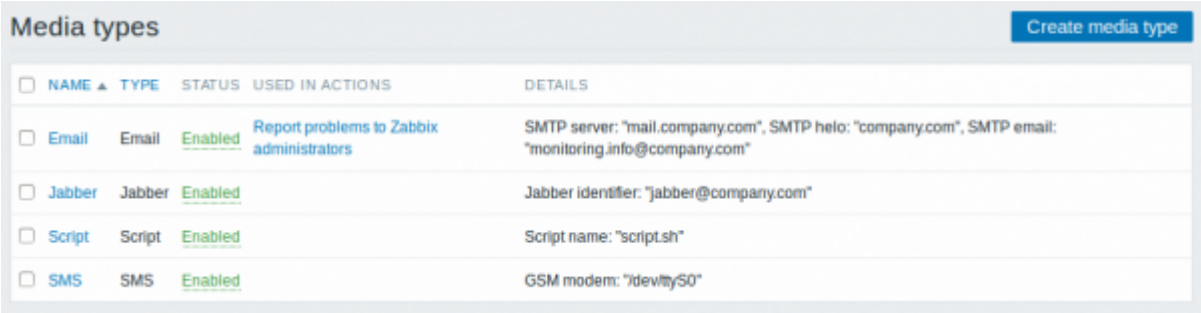
6 Media types

Overview

In the *Administration* → *Media types* section users can configure and maintain media type information.

Media type information contains general instructions for using a medium as delivery channel for notifications. Specific details, such as the individual e-mail addresses to send a notification to are kept with individual users.

A listing of existing media types with their details is displayed.



Displayed data:

Column	Description
Name	Name of the media type. Clicking on the name opens the media type configuration form.
Type	Type of the media (e-mail, SMS, etc) is displayed.
Status	Media type status is displayed - *Enabled* or *Disabled*. By clicking on the status you can change it.
Used in actions	All actions where the media type is used directly (selected in the *Send only to* dropdown) are displayed. Clicking on the action name opens the action configuration form.
Details	Detailed information of the media type is displayed.

To configure a new media type, click on the *Create media type* button in the top right-hand corner.

Mass editing options

Buttons below the list offer some mass-editing options:

- *Enable* - change the media type status to *Enabled*
- *Disable* - change the media type status to *Disabled*
- *Delete* - delete the media types

To use these options, mark the checkboxes before the respective media types, then click on the required button.
