

## Groups

Frontend can export groups only with hosts or templates. When host or template is exported all groups it belongs to are exported with it automatically.

API allows to export groups independently from hosts or templates.

```
<groups>
  <group>
    <name>Zabbix servers</name>
  </group>
</groups>
```

### groups/group

Parameter	Type	Description	Details
name	<i>string</i>	Group name.
