

template.massupdate

Description

object `template.massupdate(object parameters)`

This method allows to simultaneously replace or remove related objects and update properties on multiple templates.

Parameters

(object) Parameters containing the IDs of the templates to update and the properties that should be updated.

Additionally to the [standard template properties](#), the method accepts the following parameters.

Parameter	Type	Description
templates (required)	object/array	Templates to be updated. The templates must have the <code>templateid</code> property defined.
groups	object/array	Host groups to replace the current host groups the templates belong to. The host groups must have the <code>groupid</code> property defined.
hosts	object/array	Hosts and templates to replace the ones the templates are currently linked to. Both hosts and templates must use the <code>hostid</code> property to pass an ID.
macros	object/array	User macros to replace the current user macros on the given templates.
templates_clear	object/array	Templates to unlink and clear from the given templates. The templates must have the <code>templateid</code> property defined.
templates_link	object/array	Templates to replace the currently linked templates. The templates must have the <code>templateid</code> property defined.

Return values

(object) Returns an object containing the IDs of the updated templates under the `templateids` property.

Examples

Replacing host groups

Unlink and clear template "10091" from the given templates.
