

user.addmedia

Description

object `user.addmedia(object parameters)`

This method allows to add new media to multiple users.

This method is deprecated and will be removed in the future. Please use [user.update](#) instead.

Parameters

(object) Parameters defining the media to create and the users to add them to.

Parameter	Type	Description
medias (required)	object/array	Media to create for the given users. The media <code>userid</code> property must not be defined.
users (required)	object/array	Users to add the media to. The users must have the <code>userid</code> property defined.

Return values

(object) Returns an object containing the IDs of the created media under the `mediaids` property.

Examples

Adding a media to multiple users

Create a common e-mail media for two users. The media must send notifications about all alerts at any time.
