

## 13 What's new in Zabbix 3.4.8

### 13.1 Frontend improvements

#### 13.1.1 New translations

- Enabled Hebrew translation to be displayed by default.

#### 13.1.2 Updated translations

- Chinese (China)
- Czech
- English (United States)
- French
- German
- Hebrew
- Japanese
- Korean
- Russian
- Turkish
- Ukrainian

#### 13.1.3 Graph visual improvements in a widget

Graph display in widgets has been enhanced. A generated graph is now occupying the maximum possible space allowing more information to be displayed.

#### 13.1.4 Improved widget configuration

When adding a new widget to a dashboard or editing an existing one, change of widget type opens a form with default values set for all fields depending on the type of newly selected widget.

#### 13.1.5 Negative problem duration displayed

The frontend now may display negative values for problem duration. For more information, see [negative problem duration](#).

#### 13.1.6 Changes in default condition for trigger based actions

New actions based on triggers no longer have a predefined condition "Maintenance status not in maintenance".
