

5 Screens

Overview

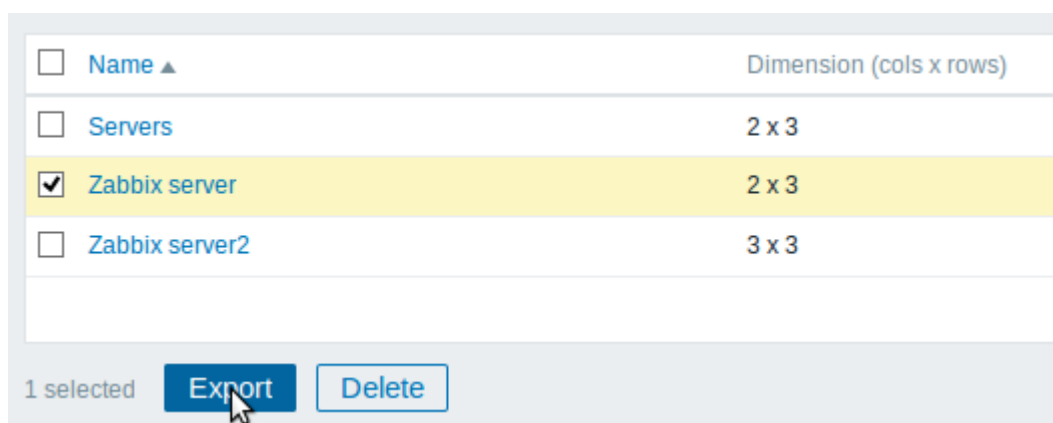

Screen [export](#) contains the screen structure - all screen settings and all screen elements along with their configuration.

Anything included in the screen itself (like a host, host group or any other data) is not exported. Thus, if at least one of the elements the screen refers to is missing, importing it will fail.

Exporting

To export screens, do the following:

- Go to: *Monitoring* → *Screens*
- Mark the checkboxes of the screens to export
- Click on *Export* below the list

The screenshot shows a table of screens with the following data:

<input type="checkbox"/>	Name ▲	Dimension (cols x rows)
<input type="checkbox"/>	Servers	2 x 3
<input checked="" type="checkbox"/>	Zabbix server	2 x 3
<input type="checkbox"/>	Zabbix server2	3 x 3

Below the table, there is a status bar showing "1 selected" and two buttons: "Export" (highlighted in blue) and "Delete".

Importing

To import screens, do the following:

- Go to: *Monitoring* → *Screens*
- Click on *Import* to the right
- Mark the required options and click on *Import*

Import file zbx_export_screens.xml

Rules	Update existing	Create new	Delete missing
Groups		<input type="checkbox"/>	
Hosts	<input type="checkbox"/>	<input type="checkbox"/>
