

user.updatemedia

Description

object `user.updatemedia(object parameters)`

This method allows to update media for multiple users.

This method is deprecated and will be removed in the future. Please use [user.update](#) instead.

Parameters

(object) Parameters defining the media and users to be updated.

Parameter	Type	Description
medias (required)	object/array	Media to replace existing media. If a media has the <code>mediaid</code> property defined it will be updated, otherwise a new media will be created.
users (required)	object/array	Users to update. The users must have the <code>userid</code> property defined.

Return values

(object) Returns an object containing the IDs of the updated users under the `userids` property.

Examples

Replacing media for multiple users

Replace all media used by the two users with a common e-mail media. The media must send notifications about all alerts at any time.

Request:

```
{
  "jsonrpc": "2.0",
  "method": "user.updatemedia",
  "params": {
    "users": [
      {
        "userid": "1"
      },
      {
        "userid": "2"
      }
    ],
    "medias": {
```

```
        "mediatypeid": "1",
        "sendto": "support@company.com",
        "active": 0,
        "severity": 63,
        "period": "1-7,00:00-24:00"
    },
    "auth": "038e1d7b1735c6a5436ee9eae095879e",
    "id": 1
}
```

Response:

```
{
  "jsonrpc": "2.0",
  "result": {
    "userids": [
      "1",
      "2"
    ]
  },
  "id": 1
}
```
