

1 Graphs

Overview

With lots of data flowing into Zabbix, it becomes much easier for the users if they can look at a visual representation of what is going on rather than only numbers.

This is where graphs come in. Graphs allow to grasp the data flow at a glance, correlate problems, discover when something started or make a presentation of when something might turn into a problem.

Zabbix provides users with:

- built-in [simple graphs](#) of one item data
- the possibility to create more complex [customised graphs](#)
- access to a comparison of several items quickly in [ad-hoc graphs](#)
