

# screenitem.update

## Description

object screenitem.update(object/array **screenItems**)

This method allows to update existing screen items.

## Parameters

(object/array) [Screen item properties](#) to be updated.

The screenitemid property must be defined for each screen item, all other properties are optional. Only the passed properties will be updated, all others will remain unchanged.

## Return values

(object) Returns an object containing the IDs of the updated screen items under the screenitemids property.

## Examples

### Setting the size of the screen item

Set the width of the screen item to 500px and height to 300px.
