

9 Upgrade notes for 4.4.0

Zabbix 4.4.0 is not released yet.

Screen element removed from screens

Zabbix screens no longer support the possibility to display another screen as a screen element. After the upgrade, all screen cells containing another screen will be empty.

Changed host export format

The format of host/template export in XML/JSON has been changed. For more details, see [What's new in 4.4.0](#).

Items table split

Realtime fields have been split from the `items` table into a new table called `item_rtdata`. See also [What's new in 4.4.0](#).
