

5 What's new in Zabbix 5.0.0

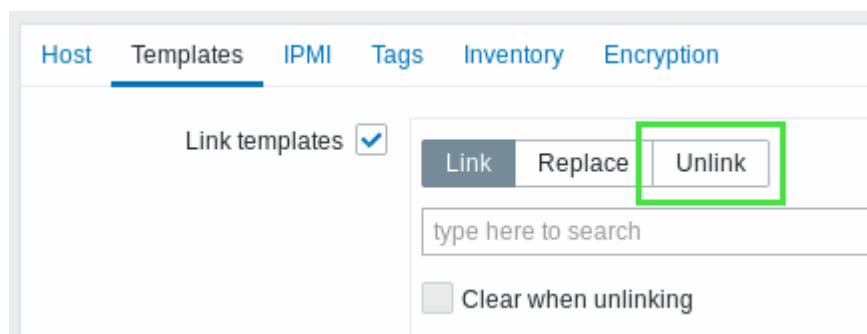

Zabbix 5.0.0 is not released yet.

Item key limit

The maximum allowed length of an item key has been raised from 256 to 2048 characters.

Mass unlinking of templates

It is now possible to mass unlink templates when using host or template mass update:

See also:

- Host mass [update](#)
- Template mass [update](#)

Detail editing as popup window

In several configuration sections of Zabbix frontend detail editing is now opened as a popup window. This is implemented for:

- Action operation details
 - in the [Operations](#), [Recovery operations](#) and [Update operations](#) tabs
- Maintenance period details
 - in the [Periods](#) tab

In many cases this change allows to de-clutter the interface of having to configure too many options in one screen. For example, details of an action operation are now opened in a separate popup window.

Discovery operations Update operations

Step duration:

Default subject:

Default message:

Assigned problems:

Operations:

Steps	Details
1	Send message

[Add](#)

* At least one operation, required

Operation details

Operation type:

Steps: - (0 - infinitely)

Step duration: (0 - use action default)

* At least one user or user group must be selected.

Send to User groups	User group	Action
<input type="button" value="Add"/>		

Send to Users	User	Action
<input type="button" value="Add"/>		

Send only to:

Default message:

Conditions	Label	Name	Action
<input type="button" value="Add"/>
