

5 What's new in Zabbix 5.2.0

Zabbix 5.2.0 is not released yet.

Time zone definition

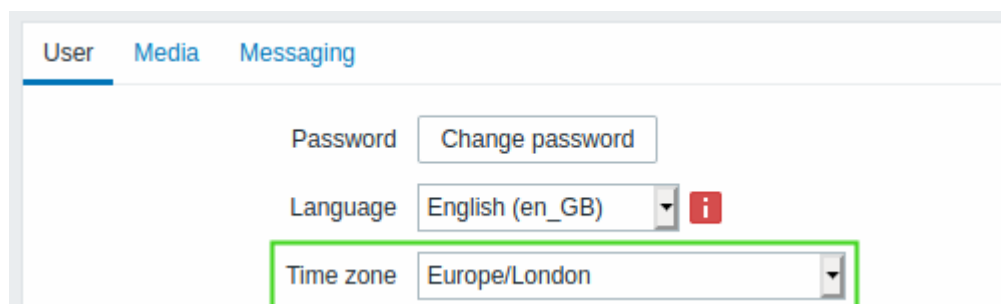

The frontend time zone now can be set globally and also adjusted for different users.

The default global timezone:

- can be set manually when [installing](#) the frontend
- can be modified in *Administration* → *General* → [GUI](#)

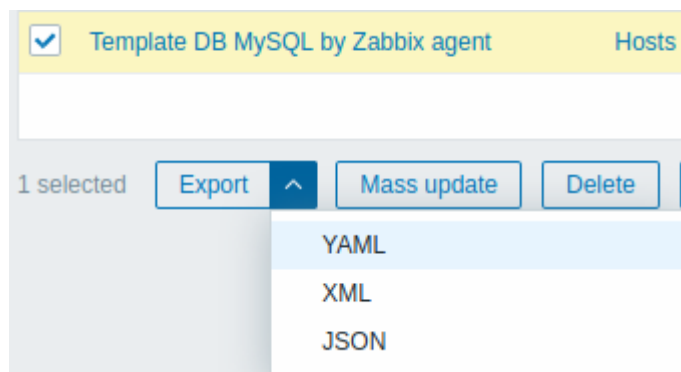

User-level time zone:

- can be set when [configuring/updating](#) a user
- can be set by each user in their [user profile](#):

Export to YAML

Zabbix configuration now can also be [exported](#) and imported in YAML format:

Note that LibYAML library (version 2.0.2 or higher) is now required for configuration export to YAML.

Frontend

Ability to change the default language

It is now possible to choose the default language for the Zabbix frontend during the [installation](#)

process. After the installation, the system default language can be changed in the *Administration*→*General*→*GUI* section. If a user has not specified another language in the profile settings, the system-wide setting is used. Login page for all users is displayed in the chosen default language.
